

Piper 01

We believe the long, lineal design of Piper offers the best of both worlds; beautiful connection to the land and passive solar principles. The clever orientation of Piper offers heaps of natural light into each of the many spaces within this home. As well as creating beautiful visuals to the outdoors, these windows provide the opportunity for natural airflow between the spaces. One of our favourite parts of this design is the master bedroom with its private deck, which creates an intimate level of luxury and a harmonious connection to the outdoors.

Size: 130 (m2)

Deck Size: 23 (m2)*
